

## Program for a martial arts school (self-defense).

### **Description:**

With the help of this program, we will be able to keep track of new and old students in the school and their advancements.

When a new student enrolls the school, we will enter their name and their age, this data will be saved, and the student will be assigned to the class of teens, adults or kids.

The program will keep track of the days the student assist to class, you upgrade belt depending on your assistance, so when entering the name of the student we will be able to see which belt is the student (white, yellow, orange, green, blue, brown or black).
